

Cytotoxic Waste Containers

PHS Wastemangement provides a range of specialist containers to allow you to effectively identify and segregate any cytotoxic or cytostatic waste you may produce.

These units are highly visible and clearly labelled to encourage the correct identification and segregation.

Capacity	Dimensions
2.5ltr	163(h) x 176(dia)
5ltr	285(h) x 176(dia)
11.5ltr	250(h) x 280(dia)
22ltr	345(h) x 330(dia)
50ltr	539(h) x 404(l) x 335(w)

EWC Code **18 01 08**

Instructions for use:

These containers should only be used for cytotoxic and cytostatic hazardous waste, ensuring that items are safely contained within the unit. When ready for disposal, ensure the lid is securely sealed.

Health and Safety Precautions: These units are designed for easy use and closure once ready for disposal. Users should follow instructions and always treat cytotoxic waste carefully, keeping it segregated from other waste.
