

Whole Service Solution

Your one-stop solution for waste disposal savings

Save money - save space - reduce waste

➤ phs Wastekit offers a whole service solution to help business reduce their waste disposal costs by up to 90%.

As well as supplying high quality baler and compactor machines, phs Wastekit offers servicing and maintenance across the UK.

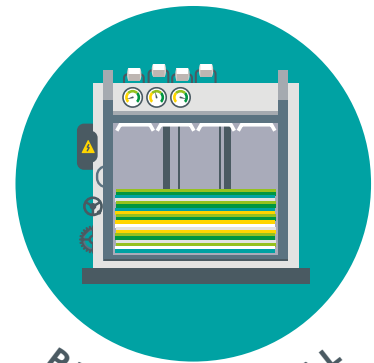

We pride ourselves on providing a customer-focussed service and the highest quality machines.

FREE BUSINESS AUDIT

REDUCE WASTE COSTS

PRODUCT TRIAL

How do we work?

- We offer a free Wastesaving Audit to all new customers, which includes a site survey, a bespoke consultation and if you're still not convinced, our team will discuss the opportunity for a free trial.
- We guarantee to save you up to 90% of your waste costs.
- We have a range of easy-to-use, high quality balers and compactors to buy or to rent - and we provide expert advice to help our customers choose the right one for their business.
- We offer flexible service and maintenance plans and a fast, professional 24 hour response to keep your machine running smoothly and efficient.
- We work with recyclers across the UK to help our customers earn money from their recyclable waste.
- We help our customers achieve their environmental goals and comply with current legislation and recycling targets.

Choosing the **right product**

> We have a range of high quality balers and compactors in different sizes and styles to suit any environment and any budget.

V-Press 504 Eco Baler

An easy-to-use entry level baler with selectable programmes for plastic and cardboard baling. It is compact and sturdy, needing minimum floorspace.

Features :

Modern microprocessor controller with membrane keypad and text display

Bale removal and transportation using a discharge trolley

Torsion Control System (TCS) for monitoring press ram movement

Double door with bell-crank lever

Ideal for: retailers, shopping centres, SME manufacturing and other SME businesses, hospitals, schools and prisons.

V-Press 605 Eco Baler

A very economical baler. It's special retaining claws optimise the compression, increasing the loading volume and the bale output.

Features :

Double door with hand-wheel lock

Mechanical bale ejector

Special retaining claws optimize the compression of the pressing material, increasing both the loading volume and bale output

Low installation height and surface

Ideal for: SMEs, small to medium manufacturers, retailers, shopping centres, hospitals, schools and prisons.

V-Press 825 Plus Pro Baler

With a very low transport height and small footprint, this robust and hard-wearing baler is perfect for compact areas.

Features :

Mechanical bale ejector belt for easy bale removal

Special hydraulic cylinders with hard chrome plated pistons reduce wear, prevent breakdowns and prolong service life

High process reliability due to HSM TCS (TorsionControlSystem)

Low installation height and small footprint

Ideal for: SMEs, garages, schools, colleges, retailers, hospitals and any business where the volume of cardboard is low but the sizes are large.

Whole Service Solution

V-Press 860 Plus Baler

With a 55 ton pressing power, this baler is the most economical and ecological solution to your waste disposal.

Features :

Special retaining claws optimise compression and reduce the number of loading actions

Easy-to-use membrane keypad with text display to show current status

Sliding door with hand wheel door lock

Produces mill size bales

Ideal for: Businesses with higher volumes of cardboard or plastic such as wholesalers, distribution companies, facilities management companies, print or direct mail businesses and large manufacture or processing companies

V-Press 1160 Baler

The top model in the V-Press series, this baler has strong pressing power, high capacity and high levels of efficiency.

Features :

High capacity pressing chamber for maximum filling efficiency

Sturdy hydraulics and hard chrome pistons ensure low maintenance and long service life

Sliding door with hand wheel door lock

Produces mill size bales

Ideal for: Businesses with higher volumes of cardboard or plastic such as wholesalers, distribution companies, facilities management companies, print or direct mail businesses and large manufacture or processing companies

Whole Service Solution

Twin/ triple chamber balers

A twin or triple chamber baler can bale high volumes of two or more different types of waste at once e.g cardboard, plastic, shrink wrap.

Multiple chambers offer an efficient way of separating different materials before baling

Fully automated bale ejector simplifies removal of bale

Additional chambers can be added for segregation or volume

Top loading

Ideal for: Medium to large manufacturers, retail outlets, food manufacturers and wholesalers.

Semi/fully automatic horizontal balers

These semi auto/fully automatic horizontal balers are suitable for sites that generate high volumes of recyclable waste such as warehouses.

Features :

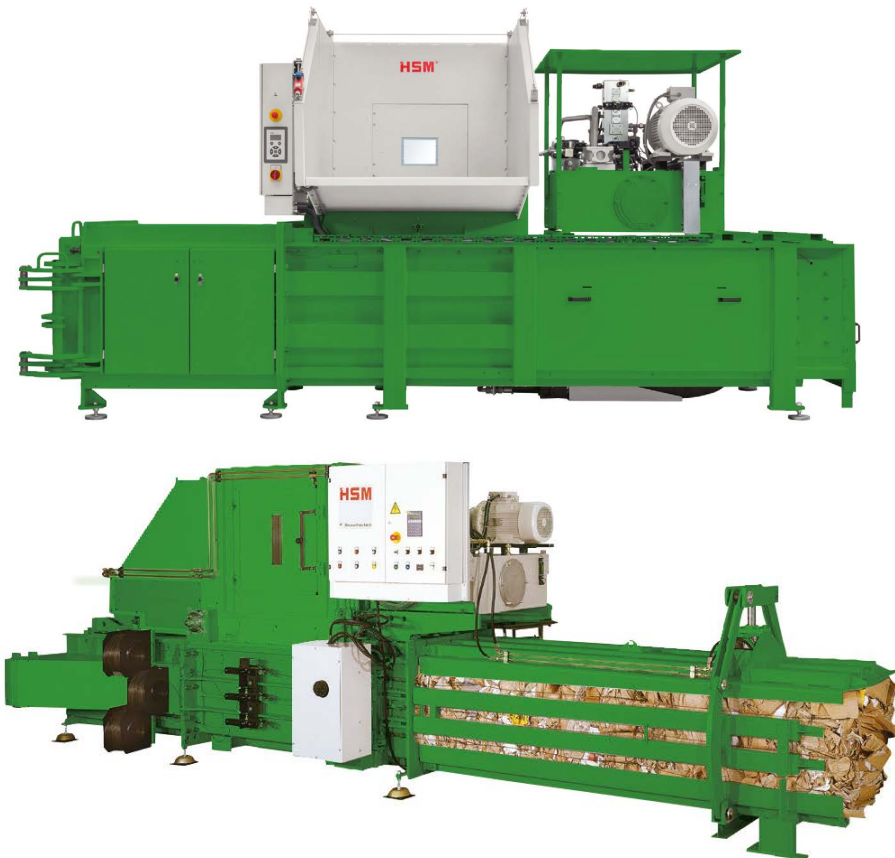

High performance, throughput and quality

Suitable for continuous loading with conveyor belt, tipping mechanism or similar

High compression and bale weights

Large loading apertures suitable for bulky material

Ideal for: Manufacturers, retailers and wholesalers.

Compactors

Bin compactors

A small, space-saving bin compactor for your general waste

Features :

25 second cycle with 3 ton press force

Top loading compactor

Fully guarded and interlocked

Fits various bin systems and sizes

Ideal for: Hotels, schools, fast food outlets, manufacturers and food manufacturers

Bag compactors

A versatile, space minimising bag compactor for your general waste

Features :

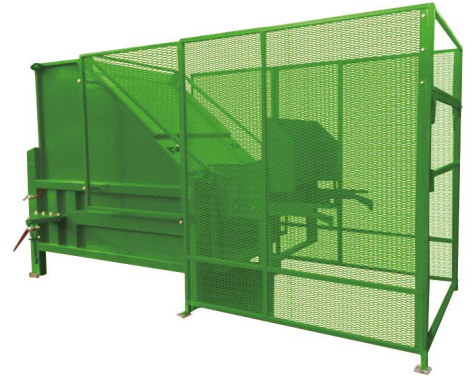

Open top-loading unit making it easy to feed material

3 ton press force

Bag protected during compaction process

Flexible compactor, helps prevent leakage and odours

Ideal for: Retail wholesalers and distributors, hotels, schools, fast food outlets and industry

Static compactors

These are long cylinder compactors designed to deal with large volumes of general waste.

Features :

Available with bin lifter (1100 litre Eurobin, 240L, 360L, 770L)

Large loading aperture

Rear or side loading

Compacts large volumes of general or dry waste

Ideal for: Manufacturers, wholesalers, large retailers and food and beverage manufacturers

Whole Service Solution

Portable compactor

Portable compactors are a highly efficient alternative to using skips for general waste.

Features :

Easy loading system

No cleaning required around the blade

Optional intergrated bin lift

Easy emptying

Ideal for: Manufacturers, wholesalers, large retailers and food and beverage manufacturers

Portable wet/general waste compactor

With the ability to process wet and problematic waste, this large baler is great for businesses that handle a wide variety of waste

Features :

Watertight seal

Throw-over blade to allow continuous safe feeding during compaction

No cleaning behind the plate required

Specialist machine for wet and problematic waste compaction process

Ideal for: Manufacturers, wholesalers, large retailers and food and beverage manufacturers

Whole Service Solution

Bottle Crusher

Bottle crushers are used throughout the hospitality sector. They have excellent efficiency with high throughput.

Features :

Reduces bottle volume 5:1

Low noise and energy efficient

Reduces glass cuttlet size

Extraction system to filter fine dust created during crushing

Ideal for: Businesses that produce large volumes of bottles such as hotels, bars, restaurants events venues

Drum Crusher

These drum crushers are excellently suited for pressing light and heavy metal waste cans or drums as well as roll hooped barrels.

Features :

Robust and reliable

Excellent reduction ratio's

Full stroke press making it suitable for various sized metal drums

Low maintenance and durable electro hydraulics

Ideal for: Manufacturing companies, engineering, construction, food production

Polystyrene Compactor

Polystyrene compactors are an effective solution for compacting polystyrene of different sizes.

Features :

Automatically breaks up large and awkward polystyrene due to the built in pre crusher

Continuous safe feeding of polystyrene

No heat applied and no fumes

One man operation

Ideal for: Wholesalers, Packaging companies where polystyrene is produced

Accessories

Our range of baler and compactor accessories support all brands of balers and compactors not just those supplied by PHS Wastekit. Visit our website to see the full range and to place an order.

We offer a fast delivery anywhere in the UK and a next working day service on stocked items if ordered by 3pm.

- Plastic sacks
- Plastic strapping
- Compactor tools
- Baling twine
- Wire ties
- Trollies

Maintenance & servicing

➤ Our team of qualified and experienced service engineers are spread across the UK, offering fast response times and a range of training, repair, parts and maintenance services in any region.

Our services are not limited to our own brands of waste handling equipment, we have the knowledge and skills to service and repair all brands on the market.

We offer three flexible service plans:

Scheduled service

A simple, cost-effective maintenance and repair plan

- Available on any make or model, regardless of age
- One simple annual payment
- Two preventative maintenance calls each year
- Approved and certified health and safety, hydraulics and electrical testing
- Unlimited call-outs (parts not included)
- 24 hour response

Priority service

Offers the reassurance of scheduled preventative maintenance and our all-inclusive parts and labour breakdown service

- Available on any new waste handling equipment
- One simple annual payment
- Two preventative maintenance calls each year
- Approved and certified health and safety, hydraulics and electrical testing
- Unlimited call-outs including all parts and labour
- 24 hour response

Complete care service

An easy and cost-effective plan that allows you to install our world leading waste handling equipment without the need for complex financial agreements or capital expenditure

- Available on any phs Wastekit machine
- Equipment rental cost included
- No capital outlay or complex finance agreement
- One simple annual payment
- Two preventative maintenance calls each year
- Approved and certified health and safety, hydraulics and electrical testing
- Unlimited call-outs
- 24 hour response
- All replacement parts included
- Machine upgrade on request
